## Rotary Magnetic Encoders

14 BIT

EASY  
MOUNTING

NUMEROUS  
OUTPUT  
OPTIONS

The RMB28 encoder module is designed for direct integration into high volume OEM applications.

The inexpensive 28 mm square PCB can also be supplied with a connector or as RMF44/RMF58 on a metal flange with 44 mm or 58 mm diameters for easy mounting. The RMB28/RMF44/RMF58 encoder modules can be used in a wide range of OEM applications, including motor control and industrial automation.

## Features and benefits

- ▶ 5 V and 24 V power supply versions
- ▶ High speed operation to 60,000 rpm
- ▶ Absolute - to 14 bit resolution (16,384 counts per revolution)
- ▶ Accuracy up to  $\pm 0.5^\circ$
- ▶ Inexpensive solution for OEM integration
- ▶ Industry standard absolute, incremental, analogue, commutation and linear voltage output formats

## General information

The encoder module consists of a magnetic actuator and a separate sensor board. The rotation of the magnetic actuator is detected and processed by a custom encoder chip mounted on the sensor board to obtain the desired output format. The output signals are provided in industry standard absolute, incremental, analog or linear voltage output formats.

For commutation outputs please refer to [Commutation and incremental magnetic encoder solutions](#).

## Product range

### AC

Analogue sinusoidal output with a single sine/cosine period per revolution.

### DC

BiSS-C interface with up to 16,384 positions per revolution and optional revolution counter.

### I

Incremental with up to 4,096 pulses per revolution (320 to 16,384 counts per revolution with 4× evaluation).

### SC

Synchro serial interface (SSI) with up to 16,384 positions per revolution.

### SI

Synchro serial interface (SSI) with 320 to 8,192 positions per revolution and incremental with 80 to 2,048 pulses per revolution (320 to 8,192 counts per revolution with x 4 evaluation).

### Vx

Linear voltage output in a range of variants.

## Storage and handling

### Operating and storage temperature

-40 °C to +125 °C  
-40 °C to +105 °C (with connector)

### Humidity

Up to 70 % non-condensing

**Readhead is ESD sensitive - handle with care.**

Do not touch electronic circuit, wires or sensor area without proper ESD protection or outside of ESD controlled environment.

## Packaging

Less than 20 products are packed individually in an antistatic box. If the order quantity is 20 systems and larger, the parts are packed in antistatic plastic trays. Magnets and readheads are packed separately.

### Specifications

<b>Power supply</b>	$V_{dd} = 5\text{ V} \pm 5\%$
<b>Current consumption</b>	Typ. 26 mA
<b>Output voltage</b>	0 V to $V_{dd}$
<b>Output loading</b>	Max. 2 mA

<b>Maximum speed</b>	30,000 rpm
<b>Operating temperature</b>	-40 °C to +125 °C

The digital relative angular position information is converted into linear voltage with a built-in 10 bit D/A converter. The linear output voltage swing ranges from 0 V and  $V_{dd}$  (5 V). The number of periods within one revolution ( $N_{\text{period}}$ ) can be 1, 2, 4 or 8, representing one full swing over an angle ( $\varphi_{\text{period}}$ ) of 360°, 180°, 90° or 45° respectively. The signal is made up of steps which represent the angular movement needed to register a change in the position ( $\varphi_{\text{step}}$ ) and the resulting change in the output voltage ( $V_{\text{step}}$ ). The number of steps in one period ( $N_{\text{step}}$ ) is given in the table below.

For clockwise rotation of the magnetic actuator, the output voltage increases. For counterclockwise rotation, the output voltage decreases.

### Timing diagram

$\varphi_{\text{period}}$	$N_{\text{period}}$	$N_{\text{step}}$	$\varphi_{\text{step}}$
360°	1	1,024	0.35°
180°	2	1,024	0.18°
90°	4	1,024	0.09°
45°	8	512	0.09°

$$\varphi_{\text{step}} = \frac{\varphi_{\text{period}}}{N_{\text{step}}} \quad V_{\text{step}} = \frac{V_{dd}}{N_{\text{step}}}$$

- $\varphi_{\text{period}}$  = Angle covered in one period (one sawtooth)
- $V_{\text{period}}$  = Output voltage range for one period
- $\varphi_{\text{step}}$  = Step angle (angular movement needed to register a change in the position)
- $V_{\text{step}}$  = Output voltage range for one step
- $N_{\text{period}}$  = Number of periods in one revolution
- $N_{\text{step}}$  = Number of steps in one period

### Output type and electrical variant

Rotation / $\varphi_{\text{period}}$	360°	180°	90°	45°
<b>Clockwise</b>	VA	VB	VC	VD
<b>Counterclockwise</b>	VE	VF	VG	VH

This product is not designed or intended for use outside the environmental limitations and operating parameters expressly stated on the product's datasheet. Products are not designed or intended for use in medical, military, aerospace, automotive or oil & gas applications or any safety-critical applications where a failure of the product could cause severe environmental or property damage, personal injury or death. Any use in such applications must be specifically agreed to by seller in writing, and is subject to such additional terms as the seller may impose in its sole discretion. Use of products in such applications is at buyer's own risk, and buyer will indemnify and hold harmless seller and its affiliates against any liability, loss, damage or expense arising from such use. Information contained in this datasheet was derived from product testing under controlled laboratory conditions and data reported thereon is subject to the stated tolerances and variations, or if none are stated, then to tolerances and variations consistent with usual trade practices and testing methods. The product's performance outside of laboratory conditions, including when one or more operating parameters is at its maximum range, may not conform to the product's datasheet. Further, information in the product's datasheet does not reflect the performance of the product in any application, end-use or operating environment buyer or its customer may put the product to. Seller and its affiliates make no recommendation, warranty or representation as to the suitability of the product for buyer's application, use, end-product, process or combination with any other product or as to any results buyer or its customer might obtain in their use of the product. Buyer should use its own knowledge, judgment, expertise and testing in selecting the product for buyer's application, end-use and/or operating environment, and should not rely on any oral or written statement, representation, or samples made by seller or its affiliates for any purpose. EXCEPT FOR THE WARRANTIES EXPRESSLY SET FORTH IN THE SELLER'S TERMS AND CONDITIONS OF SALE, SELLER MAKES NO WARRANTY EXPRESS OR IMPLIED WITH RESPECT TO THE PRODUCT, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE, WHICH ARE DISCLAIMED AND EXCLUDED.
