

# Quality Policy and Objectives

## Quality Policy

The satisfaction of our customers is the measure of success of our company and every individual, so we will continue to improve our internal processes based on the know-how and the experience of every employee. We are going to continuously acquire and perfect our knowledge and experience, embedding it into new advanced products so our customers will get the best value for money. We will listen to the customers' wishes and suggestions for the improvements and modifications to our products, always offering them the best solution for their needs. Product quality and customer satisfaction will be based on an honest attitude towards work, our colleagues, partners, and social and natural environment.

**Our mission** is to develop, manufacture and supply advanced rotary and linear motion sensors and motion sensing components in order to satisfy the growing market demands to the greatest extent possible.

**Our vision** is to become the leading provider of innovative rotary and linear motion sensor systems on a global scale.

**Our values**, fundamental to our own integrity, are our commitment to continuous improvements and reflect in our attitude towards work, colleagues, partners and the environment.

- ✓ Respect and responsibility towards the natural and social environment.
- ✓ Knowledge as the driver of progress in all areas.
- ✓ Stakeholder satisfaction and trust.

## Quality Objectives

- ✓ Ensuring the liquidity of financial operations and positive business performance through rational operations and resource use. Continuously upgrading and improving the knowledge of our employees.
- ✓ Increasing sales volume on the global market.
- ✓ Continuous improvements of business processes and quality.
